

Later Reading Roadmap

We aim for all pupils to achieve the following:

- To develop a love of reading differentiated to the needs of the children
- To ensure reading is a fundamental skill worked upon in all aspects of the curriculum
- To read with confidence and fluency to support independence and later life learning

Implementation

For those cognitively able, when entering a key stage, they will undergo a reading assessment.

Reading will be taught discreetly for those following the 'fresh start' programme. For those not following the fresh start programme support reading groups will be carried out each day.

Reading will also be taught in every lesson to ensure children continue to develop and generalise their reading skills and develop a love of reading.
